Claims

English Abstract

...the remote stations; calculating, at each of the stations, of a priority according to a **predetermined** protocol for the respective station; transmitting, by the stations, of a signal at a **predetermined** time and frequency, the time and frequency being indicative of the calculated priority, wherein more...

Detailed Description

... of remote

stations, Each of the plurality of stations calculates its priority according to a **preset** protocol and broadcasts or transmits an indication signal during a time period which is indicative...

...within this range, The time or

time/frequency slots are now distributed,, either by a **predetermined** protocol or specifically by the particular call, so as to cover this range of priority...

...range

broadcast or otherwise transmit indication signals in response to the new call in the **predetermined** time or time/frequency slots. This process of determining the highest range of priorities and...

...to be significant

or the number of sub-ranges which are filled falls below a **predetermined** number based on the statistics of the total number of participating remote stations and the final range or priorities or where some other **predetermined** criteria is reached, At this ...allotted. Other types of slots can also be used for the identification stage, such as **coded** spread spectrum signals, Additionally, multiple slots may be used for the same priority range to...

...remote stations;  
(b) calculating, at each of the stations, of a priority according to a **predetermined** protocol for the respective station; and  
(c) transmitting, by the stations, of a signal at a **predetermined** time and frequency, said time and frequency being indicative of the calculated priority.

In a...at the same time and frequency.

Preferably, the stations respond to the call during a **predetermined** period divided into time/frequency slots wherein each time slot represents a range of values...

...values. Preferably, the stations respond to the additional call by transmitting a signal at a **predetermined** time and frequency, said time and frequency being indicative of the calculated priority within the...

...at each of the stations, which calculate a priority of the station according to a **predetermined** protocol in response to the call; and  
(c) a plurality of second transmitters each associated with one of the remote stations which transmit a signal at a **predetermined** time and frequency, said time and frequency being indicative of the calculated priority.

BRIEF DESCRIPTION...claim would not be recognized.

In a preferred system where many factors are taken into **account** the priority assigned to each taxi may often be viewed as a multi-dimensional vector...priority may be sent together with the call or, alternatively, may be part of a **preset** protocol used for all such determinations, Alternatively, there may be several such protocols one of...described below, taxis having a lower priority are

- 14

excluded from further consideration.

If a **predetermined** criteria for stopping the targeting phase has not been reached, then an additional call is...

...using the special slot,  
This iterative reduction of the number of participants continues until a **predetermined** criteria is reached, This criteria may include consideration of the priority resolution achieved, The criteria...having successively finer priority resolutions (i.e, sectors of successively decreasing width AR), until a **predetermined** resolution is reached, At this point, the width of the remaining sector is sufficiently small...Limit1, Limit2:Application-dependent maximum number of iterations for Phases 1 and 2, respectively,  
n : **predetermined** number'of successful iterations  
PS : Priority slot  
Thus,, referring to Figs, 5A and 5B,, if...  
...than a minimum resolution determined in accordance with the protocol (and the iteration process has **not** been **terminated** for some other **reason** ), further priorities having a coarser resolution are assigned to all of the participants who have...prevent correct determination of the highest priority participant,  
The protocol can take this possibility into **account** by

reserving, preferably, the first indication time slot in the next iteration for exclusive transmission...in the particular example described above, during the first phase of targeting it may be **predetermined** that each sector has a width of 10 km and that in subsequent phases, the...computer 64 and functions as a positioning means for providing positioning information relative to a **predetermined** origin in respect of the corresponding participant. Thus, once the location of the customer is...targeted by the control center, a participant starts to measure elapsed time and waits a **predetermined** elapsed time locked on to the first channel and thereafter returns to the broadcast control...time that a vehicle is behind schedule. Vehicles which are behind schedule more than a **predetermined** amount would then be targeted and identified in a second (identification) stage, Preferably, the identified...

#### Claim

... remote

stations;

(b) calculating, at each of the stations, of a priority according to a **predetermined** protocol for the respective station in response to the call; and

(c) transmitting, by the stations, of a signal at a **predetermined** time and frequency, said time and frequency being indicative of the calculated priority,

15 2...

...4, A method according to claim 1 or claim 2, wherein the stations transmit at **predetermined** times and frequencies and .24 wherein both the time and the frequency are indicative of...

...to any of the preceding claims, wherein the stations respond to the call during a **predetermined** period divided into time/frequency slots and wherein each slot represents a range of values...

Detailed Description

Claims

English Abstract

...containing data files corresponding to players. The data files contain  
information such as credits or monies in an account which belong to  
the player and which may be used by the player to play...

Detailed Description

... In one embodiment, information regarding a player's deposits or  
credits are stored in a financial account or file.

In another embodiment, a player's withdrawals, such as bets or ...a  
player are monitored. This information is also stored, such as in the  
player's financial account .

A player's losses (or winnings) are monitored using the player's deposit  
or credit...In one or more embodiments, the player's file or files  
represent one or more financial or award accounts . In one or more  
embodiments, the data file includes player play or reward information.  
The...Use by a player of their player card permits the player to access  
both their financial account (such as by betting credits associated  
with the account) and their reward account (such as...

...accounts or files are associated with a player.

One or more of the files or accounts are financial accounts having  
associated credit information.

A player ...in the player's funds account.

In accordance with the invention, a player establishes a **financial account** directly With a casino. The player and casino are permitted to manage the account. The...this comprises providing the account provider with a routing number for a checking or savings **account** at a **bank** , **account** and access information for an ATM card linked to an account, or a credit card...violation of account terms and conditions or for a wide variety of other criteria or **reasons** .

If the account is **not closed** , then in a step S4c, it is determined if the account is expired.

The account...to be made. The source of funds may be a customer's credit card, a **bank account** , or another account in accordance with the present invention. The customer will also have provided...or customer representative and provide source funds data.

This data may comprise credit card information, **bank account** and routing information or the like. The customer may also arrange for funds transfer between **accounts** at a **bank** or similar provided customer station, phone controlled system or the like.

As one aspect of...In one embodiment, the financial transaction host 120 includes hardware and/ or software for creating **financial accounts** such as described above, and for implementing account transactions, as also described herein. In one...102 approving the bet, and the monies or credits are deducted from the player's **account** . The deducted **monies** may be tracked for accounting purposes, such as by crediting the debited amount to a...functions are enabled. If a player has more than one account, such as a debit **financial account** for playing games and a credit account to which winnings are paid, then when playing...at the time the winning is credited.

In one or more embodiments, a player's **financial account** may also comprise a player tracking account. In this arrangement, the account may be associated...and other information as is known in the art. Alternatively, a player's tracking and **financial accounts** may be linked.

As noted above, in a preferred arrangement, a player is issued a single access media which is associated with both the **financial account** and player account (whether such accounts are separate or merged). In this arrangement, activities associated...to the gaming machine, ,and the bet amount may be debited from the player's **financial account** . If the accounts does not include sufficient funds, the player may be notified, such as...

...their account.

In one embodiment, a player may be permitted to deposit funds into their **financial account** at the gaming machine 102. A player may insert ... may be credited to the appropriate charity account and the remainder to the player's **financial account** . If the player wishes, the winnings may be deposited in a separate winnings account belonging...player may also be able to deposit funds. In one embodiment, a player may provide **bank account** or credit card account information which is then used by the financial transaction host 120...tracking account in a similar manner or at the same time as they obtain their **financial account** information. As is known, it is common to award points to game players based upon...other goods and services.

In one embodiment, a player may be provided with both their **monetary account balance** and their point total. In some instances, a player may be permitted to "buy" player...

...the level of points necessary. The player may be permitted to transfer

money from their **financial account** to the casino to buy the additional ...turn in their points at a predetermined rate for money which is deposited in their **financial account** .

In one or more embodiments, a player may be permitted to use deposited funds at...13 8 to the player tracking server 136. In addition, a player may use their **financial account** to both fund their betting activities and receive winnings.

In like manner to the play...event of linked players, such as a family, multiple players) from playing games or deducting **monies** from their **account** for at least a period of time in the event it is determine the player...server. In the event the loss criteria are met, the software may prevent deductions of **monies** from the **account** . The deductions may be limited to requests for credit at gaming machines, or may also...may be transmitted from the casino to the financial institution for association with a file/ **account** at the **financial** institution.

While specific reference is made to player losses herein, will be appreciated that the...and systems described herein.

In accordance with the invention, a player has control over their **financial account** . In one embodiment, so does the casino. The casino may access the player's account...the funds must be bet or bet lost.

A casino may enable usage of a **financial account** via on-line game play and table or other games besides electronic and electro-mechanical ...the funds in the account, a minor may complete a transaction without concern to the **account** provider/ **financial** institution that the minor will pay for goods.

In one or more embodiments,

#### Claim

... plurality of gaming devices associated with a server comprising the steps of. generating a first **financial account** corresponding to a player, said account represented by at least one data file, said at...13 including the step of associating credits represented by said financial information with a second **financial account** in accordance with input from said player.

15 The method in accordance with Claim 7...30 including at least one currency dispensing apparatus for dispensing currency associated with a player **account** at a **financial** institution and wherein said card reader is associated with said currency dispensing apparatus.

33 A...in which a player may play one or more games comprising the steps ofgenerating a **financial account** corresponding to a player, said account represented by at least one data file, said at wherein said step of generating a **financial account** includes associating a player identifier with said account. . The method in accordance with Claim 34... a server, the server including at least one data file representing a player account, said **account** containing player **financial** information comprising the steps of: crediting monetary amounts to said player for use in playing...

Detailed Description

Detailed Description

... field memory is divided into blocks having registers,  
with each bit uniquely associated with one **register bank** .

In order that features and advantages of the present  
invention may be more fully appreciated...mechanism would have to take  
account of the

IE value in order to inhibit or **not** , **closure** of the  
transfer gates associated with that,  
Whilst this would yield an operational device, to...16 banks of  
registers within the circuit.

8 Blocks x 2 banks = 16 banks of **registers**

Each **bank** contains a sufficient number of registers,  
both read and write, to store 5 words to...

...to 3 and

prefixed W or R to indicate Write or Read mode. Beside  
each **register bank** are pointers, such as pointer 26,  
which select one of the five word options.

Using...2 shift registers, one for the  
write and one for the read mode. It is **configured** as a  
**closed** loop and NC (Number of Cells) cells in length.

The mini-cache is a dedicated...
